### 9 TIPS ON KEEPING CASK ALE

Over 90% of consumers say that quality is the most important factor. Two thirds will reject a pint if it is perceived to be poor in quality.

#### 1. ORDERING

Order the correct size of cask and aim to sell it within three days. If the cask is left for more than three days, the beer will start to taste dull and tired.

#### 2. STORAGE

Casks must be stored in a temperature-controlled cellar between 11°C and 13°C (52–55°F), ideally at 12°C (54°F). Beer needs to be at the right temperature to condition correctly.

#### 3. STILLAGING

Casks should be stillaged for at least three days before sale. If some casks have to be stillaged later, roll them before stillaging. Level stillaging creates a gas pocket beneath the shive and encourages good venting when soft, porous pegs are inserted. As the sediment drops, it falls safely into the belly of the cask, away from the tapping point. If the cask is stillaged on a forward tilt, the gas pocket will be at the back of the cask, so beer and not carbon dioxide gas will be pushed through the soft porous tap.

#### 4. PEGGING AND VENTING

Casks should be vented with a soft porous peg 2–6 hours after delivery. Check the cask frequently and change the peg if it becomes blocked. When strong fermentation finishes, insert a hard, non-porous peg into it.

**Why? This brings the beer to its ideal condition for the customer. It helps with the clarification process and once the beer is on sale it will help maintain the right amount of carbon dioxide.**

#### 5. TAPPING

Tap all casks 24-48 hours before they go on sale.

**Why? This eliminates the opportunity for microorganisms to spoil the beer.**

#### 6. SAMPLING

Sample beers for clarity, aroma and taste after tapping each day before serving. Always sample from the cask before connecting the beer lines.

**Why? Pulling through to the bar wastes beer and if the beer isn't ready, the customer notices.**

#### 7. SERVING

Once on sale, the beer is exposed to air which causes rapid deterioration. Empty casks as soon as possible, ideally within three days.

**Why? Air drawn into the cask causes oxidation, which causes the ale to sour.**

#### 8. TILTING (STOOPING)

Gently tilt the cask when it's between 1/2 and 2/3 full, either by raising the back or lowering the front.

**Why? Tilting the cask too far or too quickly could disturb the sediment, risking hazy beer.**

#### 9. CLEANING

Clean beer lines and equipment every five days using the equipment and methods recommended by your beer company cask supplier.

**Why? One of the most important factors in high quality cask beer is the cleanliness of the dispense equipment. As well as harming the taste and clarity of the beer, dirty systems can cause malfunctioning and uncontrollable fobbing.**

### BREAD & BUTTER

DRY HOPPED PALE | 3.9%

PINEY | CITRUSSY | FRESH

Our classic cask favourite, Bread & Butter has been reworked to make that reward for a hard days work more satisfying than ever. British malts are combined with double the layers of US hops for a still fresh but punchier dry-hopped pale ale.

Strong flavours of pine, peach, lychee and citrus. Finished off with resinous piney notes for a smooth, rounded bitterness.

Hops: Citra, Mosaic & Simcoe

### HEART & SOUL

SESSION IPA | 4.4%

FRUITY | TROPICAL | HOPPY

Created from the heart and brewed with a double dose of devotion, this full-bodied fruity beer has all the hoppy goodness of an IPA, but with a seriously sessionable strength.

Expect a fruit salad flavour with bold notes of passionfruit, grapefruit, gooseberry, pineapple and mango.

Hop: Mosaic

### PRIDE & JOY

AMERICAN PALE | 4.8%

FRESH | CRISP | HOPPY

This classic American-style pale is refreshingly crisp, clean and hoppy. Beaming with bold flavours and aromas, it's a true reflection of our passion for brewing and a total joy to drink.

Expect bold notes of citrus, blueberry, tropical fruits and earthy pine, layered over a balanced malty base.

Hops: Citra & Simcoe
